EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In claims 1, 15, 23, 57, 60, 61, and 62 (near the ends of the claims), please change "illuminans" to – illuminant --.

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance:

None of the cited prior art references discloses or suggests the claimed steps of mapping RGB values of a first device into gamut expanded sRGB (i.e. "XsRGB") values, using the claimed mapping transformations.

Also, none of the cited prior art references discloses or suggests the claimed steps of converting the gamut expanded sRGB (i.e. "XsRGB") obtained by the mapping transformations into RGB color data values of a second device, using the claimed converting transformations.

Neither Holm nor Pritchett disclose or teach any details of the transformation matrices for converting between an RGB color space and an expanded sRGB color space.

Hidaka does not disclose or teach the claimed transformation matrices since Hidaka utilizes XYZ as an intermediate color space rather than a gamut expanded sRGB color space, as claimed. See e.g. figure 7 of Hidaka.

IEC 61966-2-1 (sRGB) discloses conversions between RGB and sRGB color spaces but does not expressly teach converting between RGB and a gamut expanded sRGB using the claimed transformation matrices. Furthermore, IEC 61966-2-1 does not employ the white-point correction represented by the claimed S_w and S_w^{-1} matrices.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
